NOV 2 1956

Honorable Arthur S. Flemming
Director
Office of Defense Mobilization
Washington 25, D. C.

Dear Mr. Flemming:

I do not feel that we in the Central Intelligence Agency are sufficiently familiar with the problems of frequency congestion described in your letter to me of 19 October 1956, to be able to offer any useful suggestions for relieving the present acute situation.

This Agency is not a large user of radio frequencies. Our needs are normally confined to those portions of the HF, VHF and UHF bands presently allocated to the Fixed and Mobile Services. However, in our future limited development program we will maintain liaison with other development agencies as necessary to assure that proper coordination and consideration of frequency management problems are effected.

Sincerely,

SIGNED

Allen W. Dulles

CONFIDENTIAL

MEMORANDUM FOR: THE DIRECTOR

The attached letter to the Director, Office of Defense Mobilization, is in reply to his request for suggestions in relieving the present situation where-
by the upper frequency regions are becoming congested. The reply advises that we are not sufficiently concerned with the problem at this time to be able to offer any useful suggestions, but will maintain liaison with other agencies to assure coordination.

Your signature is requested.

H. GATES LLOYD
Assistant Deputy Director
